**Step 3:** The user will be brought to the application's main screen, where all nearby trails in your region will be immediately shown. A navigation bar with buttons for Explore, People, Navigation, Save, and Profile will appear at the bottom of the application.

Step 4: Once the user selects a desired exploration location, a screen with trail information and a picture depicting the trail views will appear. The user will be able to see the app reviews through Rating and reviews in addition to the Direction, Navigation, Share, and Download buttons.

**Direction Button** - You can locate the trail by using this button.

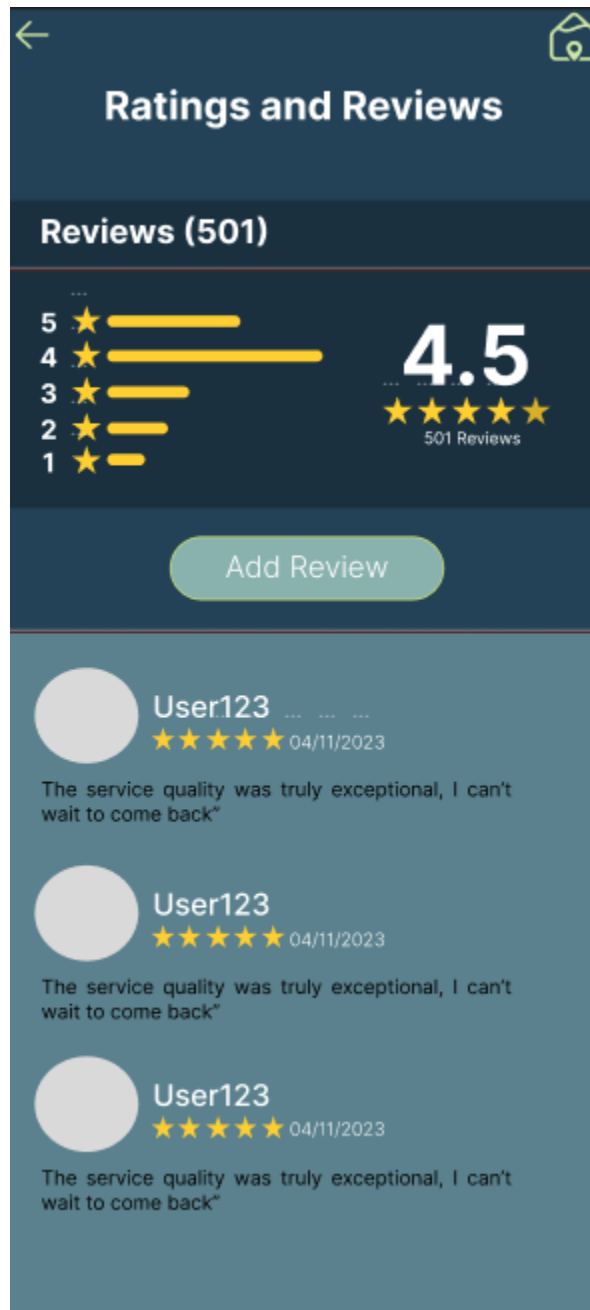

**Navigation Button** - The trail map will appear when you click the navigation button.

**Share** - This button allows the user to share the trail's location with other users.

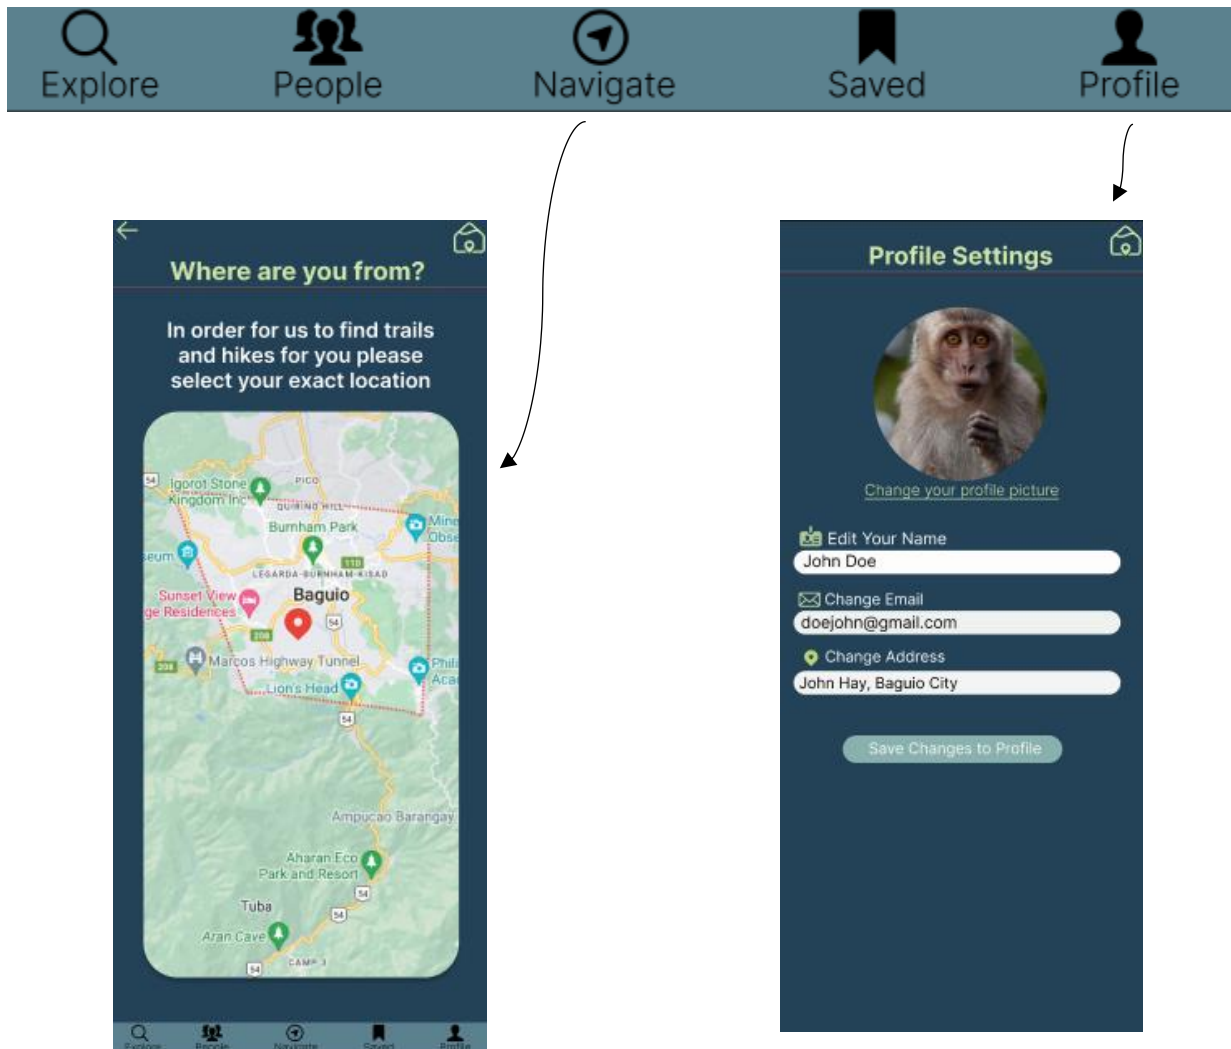

**Download** - The Download button allows the user to use the map navigation offline.

**Trailer Start** - The trail will now begin if the user clicks this button.

**Step5:** By clicking the review button, you will be directed to the screen below, where you can see all of the trailer reviews and the trail rating. By clicking the Add review button, the user will be able to add reviews.

## Navigation Bar Buttons

**Explore** - This is the home button, which displays all of the trails.

**People** - People will display all of the Trailers with which you are interacting.

**Navigation** - The navigation button will reconnect the user to the previous trail they are currently on.

**Saved** - The Saved button will show all of the downloaded trails.

**Profile** - The Profile button displays the user profile, including the profile photo and username.
